

DCN-3388R

RECEIVER

Highly Flexible and reliable DCN-3388 UHF wireless conference microphone system is the best choice to setup wireless conference room sound system. It has compact structure and simple connectivity and it can be connected to any small to large scale conference room applications. DCN-3388 Wireless microphone conference system support different meeting modes, like Limit (1/2/3/4), FIFO (1/2/3/4) and chairman only. Single microphone receiver allows message receiving from 1000 microphones simultaneously and when linked with video processor, video tracking for 256 microphone could be released. Meanwhile 5 microphone could be activated at the same time.

**Specifications**

Frequency	UHF 610MHz - 664.75MHz
Oscillation model	PLL Technology
Frequency Stability	<+/- 10PPM
T.H.D	<0.5%
Frequency response	60Hz - 16kHz
Dynamic Range	> 105dB
Power Supply voltage	AC 110V/220 50/60HZ
DC Input Voltage	DC 12V , 800mA
Dimension	2U Rack 19"
Net weight	7.2 Kg
